IT internship

JOB APPLIED FOR
POSITION
PREFERRED JOB
PROFILE

Software Engineering student at EKA University of Applied Sciences in Riga, with practical experience in backend development, AI-powered applications, cloud infrastructure, and DevSecOps. Experienced in building secure APIs, hybrid GraphRAG retrieval systems, asynchronous processing pipelines, and automated CI/CD workflows. Interested in contributing to innovative software solutions while developing expertise in scalable systems, AI engineering, and cloud technologies.

WORK EXPERIENCE

01 July 2026 - 30 August 2026

Software engineer internship (AI Agents and MCP usecases)

Attijari Bank, Tunis, Tunisia *(https://www.attijaribank.com.tn/fr)*

- Architected and implemented a cloud-native GraphRAG regulatory monitoring platform using Flask, Angular, PostgreSQL, Neo4j, Weaviate, Redis, Celery, LangChain, and Gemini.
- Designed an asynchronous event-driven architecture for document ingestion, PDF processing, embedding generation, graph construction, audit logging, and distributed background tasks.
- Built hybrid retrieval combining vector search, BM25, and knowledge-graph traversal to produce source-grounded regulatory answers.
- Automated Azure infrastructure provisioning with Terraform and server configuration with Ansible, Docker, Docker Compose, Nginx, and GitHub Actions.
- Established DevSecOps CI/CD pipelines incorporating CodeQL, GitGuardian, dependency scanning, Trivy, Docker image scanning, Terraform validation, smoke tests, and k6 load testing.
- Implemented observability and incident response using OpenTelemetry, structured logging, health checks, Grafana dashboards, n8n workflows, and Telegram alerts.
  Project Link: https://github.com/chedy322/Attijary-graph-rag

01 February 2025 – 30 October 2025

Software API developer volunteer

Komunikon Startup, Switzerland (https://www.komunikon.com/)

- Developed robust APIs using JavaScript (Node.js, Express.js).
  Managed databases using MariaDB and the Sequelize ORM.
- Conducted code reviews and provided constructive feedback to the team.
- Implemented advanced security and authentication protocols: Bcrypt, OAuth2, and JWT.
- Produced comprehensive technical documentation for endpoints, parameters, and authentication methods.

EDUCATION AND TRAINING

February 2024- February 2028

Professional Bachelor Degree in Computer Science and Programming Engineer

8.7 GPA

Eka university of Applied sciences, Riga, Latvia

• Relevant coursework:
Software Engineering & Methodologies, Application Development, Data Systems, and Applied Tech

Tunisian Baccalaureate (Secondary School Leaving Certificate)

PERSONAL SKILLS

Mother tongue(s): French-Arabic

Other language(s)

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C1	C1	C1	C1	B2
	University of Urbino Carlo Bo exam				
Italian	A1	A1	A1	A1	A1
	Tunisia official final exam				
German	A1	A2	A1	A1	A1

Levels: A1/A2: Basic user - B1/B2: Independent user - C1/C2 Proficient user
Common European Framework of Reference for Languages

Communication skills

- Effective technical communication developed through collaborative software development, code reviews, API documentation, and cross-functional project work.
- Comfortable communicating in multilingual and international academic and professional environments

Organisational / managerial skills

- Able to break down complex engineering requirements into manageable implementation tasks.
- Experience organizing development workflows, documenting technical decisions, and coordinating work through version control and CI/CD pipelines.
- Self-directed learner with an interest in continuous improvement and engineering best practices.

Job-related skills

Software engineering and backend development
- Java, Python, JavaScript, Node.js, Express.js, Flask, Spring Boot.
- REST API design, authentication, authorization, and secure application development.
- Clean Architecture, domain-driven design, DTOs, and software testing.

Artificial intelligence
- Retrieval-Augmented Generation (RAG), GraphRAG, embeddings, semantic search, and hybrid retrieval.
- LangChain, LLM integration, knowledge graphs, and AI agent workflows.
- Familiarity with Model Context Protocol (MCP) use cases.
- Machine Learning.

Cloud, DevOps and security
- Docker, Docker Compose, GitHub Actions, CI/CD, Terraform, and Ansible.
- Azure fundamentals, Nginx, Redis, and asynchronous task processing.
- CodeQL, Trivy, dependency scanning, secret detection, and application observability.

Databases and tools
- PostgreSQL, MariaDB, MySQL, Redis, Neo4j, Weaviate, Firebase.
- Git, GitHub, Linux, and SQL.

© European Union, 2002-2018 | europass.cedefop.europa.eu

Digital skills

SELF-ASSESSMENT				
Information processing	Communication	Content creation	Safety	Problem solving
Proficient user	Proficient user	Basic user	Proficient user	Proficient user

Levels: Basic user - Independent user - Proficient user
Digital competences - Self-assessment grid

Other skills

- Analytical thinking and structured problem solving.
- Independent learning and technical research.
- Adaptability in international and multicultural environments.

ADDITIONAL INFORMATION

Certifications

- Certification of Internship at Attijari Bank – Attijary Bank.
- Certification of Recommendation – Jiotify Startup.
- GitHub Foundations Certification - GitHub.
- The Complete Python Developer - Udemy.

Publications

- Web app for remote monitoring and control for devices and pumps,Project Work,Riga 2025.

.

Honours and awards

- Hackthons Winner - First-place idea award SeaSweeperTeam - Riga TechGirls.

Projects

Enterprise Product Management Platform

- Designed a layered backend architecture using Clean Architecture and Domain-Driven Design (DDD) to improve maintainability and separation of concerns.
- Developed secure REST APIs using Java, Spring Boot, Spring Security, and DTO-based communication patterns.
- Implemented Redis caching, containerization with Docker, and automated CI/CD pipelines using GitHub Actions.
- Deployed the application on an Azure Virtual Machine and integrated Azure Application Insights for monitoring and centralized logging.
- Designed Blue/Green deployment workflows to support safer application releases.
- **Technologies:** Java, Spring Boot, Spring Security, PostgreSQL, Redis, Docker, Azure VM, Azure Application Insights, GitHub Actions.
  Project Link: https://github.com/chedy322/Product-Management-System

Production-Ready RAG AI Platform

- Developed a Retrieval-Augmented Generation (RAG) platform combining dense vector retrieval with sparse keyword-search fallback to improve retrieval robustness.
- Implemented document ingestion, metadata filtering, and reranking to improve the relevance of retrieved context.
- Integrated LLM-powered responses and semantic search using LangChain, Weaviate, and the Gemini API.
- Implemented Redis caching, Firebase integration, and Docker-based deployment workflows.
- Deployed the application on Render and configured CI/CD automation using GitHub Actions.
- **Technologies :** Node.js, Express.js, LangChain, Weaviate, Gemini API, Redis, Firebase, Docker, GitHub Actions, Render.
